

OT DX 110/220...240/1A0 DIMA LT2 E

OPTOTRONIC - DEXAL NFC IP20 | D4i, DEXAL, AstroDIM, StepDIM - constant current LED drivers

A termék jellemzői

- Current output range: 70...1,050 mA
- Standby power consumption: < 0.5 W

A termék előnyei

- For Zhaga Book18 Luminaires and D4i certified incl. Parts 25x + AUX
- Low luminous efficacy tolerance through low output current tolerance of $\pm 3\%$

Alkalmazási területek

- Street and urban lighting
- Industry
- Suitable for outdoor applications in luminaires with IP > 54
- Suitable for use in outdoor luminaires of protection class I and II

Műszaki adatok

Elektromos adatok

Névleges feszültség	220...240 V
Bemeneti feszültség, AC	198...264 V ¹⁾
Bemeneti feszültség DC	176...276 V ²⁾
Névleges áram	053 A
Hálózati frekvencia [calc.]	0/50/60 Hz ²⁾
Teljesítménytényező, λ	073C099 ³⁾
Teljes harmonikus torzítás	< 10 % ⁴⁾
Készülék vesztesége	8,0 W ⁵⁾
Bemelegedési áram	65 A ⁶⁾
Megszakítón megengedett előtét db 10 A (B)	7 ⁷⁾
Megszakítón megengedett előtét db 16 A (B)	12 ⁷⁾
Előtétek legnagyobb db-száma/megszakító	19 ⁷⁾
Lökőfeszültség-állóság, (L/N-föld)	10 kV ⁸⁾
Lökőfeszültség-állóság, (L-N)	6 kV ⁹⁾
Névleges kimeneti teljesítmény	110 W ¹⁰⁾
Legnagyobb kimenő teljesítmény	110 W
Efficiency in full-load	93 % ¹¹⁾
Névleges kimeneti áram	200...1050 mA
Default output current	700 mA
Kimeneti áram tűrés	±3 % ¹²⁾
Kimeneti ripple áram (100 Hz)	10 %
Legkisebb kimeneti áram	70 mA
Galvanikus elválasztás	Double
Névleges kimeneti feszültség	75...220 V
U-OUT (üzemi feszültség)	250 V
Névleges bemeneti feszültség (SD port)	220...240 V ¹³⁾
Auxiliary Power Supply	24 V ¹⁴⁾
Output current LEDset open	70 mA
Output current LEDset shorted	Not allowed

1) Permitted voltage range
2) Additional fuse needed in DC operation
3) Full Load/Half Load at 230V 50Hz
4) Max. output power at 230 V_{AC}
5) Maximum
6) At 160 μs
7) Type B
8) Single pulse 10kV / 12 Ohm (1.2/50 μs)
9) @ 2 Ohm, acc. to EN61547

Termék adatlap

- 10) Max. 75% in DC operating mode
- 11) at 230 V, 50 Hz
- 12) +/- 5% for LEDset down to 300mA
- 13) with external component 'OT DX SD BOX' only
- 14) 3W average, 6W peak power

Candidate List Substance 1	Lead
CAS No. of substance 1	7439-92-1

Termék adatlap

Safe Use Instruction	The identification of the Candidate List substance is sufficient to allow safe use of the article.
Declaration No. in SCIP database	44acb921-0351-4d24-891d-84eb97da08de

Adatlap szöveg

- Shut down of output load happens if the input voltage of the load is below the allowed minimum output voltage of the driver. The driver automatically tries to switch on the load cyclically.
- The driver automatically reduces the output current in case the maximum allowed output power is exceeded, as long as the input voltage of the load is within the declared output voltage range of the driver. In all other cases the driver may shut down the load.
- The driver is protected against temporary overheating by automatically reduction of the output current.
- Several external NTCs are supported for temperature protection of the LED module or luminaire. The type of NTC can be selected in the programming software in the temperature based mode. By default the resistor based mode is activated with following values: start derating: 6.3 kOhm, end derating 5.0 kOhm, shut off: 4.3 kOhm, derating level 50 %.
- The constant lumen feature is disabled by default.
- If any output level is below the physical min level, the physical min level will be used.
- not relevant
- The DEXAL interface is polarity sensitive, even if the DEXAL bus power supply in the driver is turned off. Therefore the polarity of all connected drivers should not be mixed.
- For efficiency and standby power measurement, the D4i bus power supply shall be switched off by using Tuner4TRONIC. Refer to www.tuner4tronic.com.

Ecodesign regulation information:

Intended for use with LED modules.

The forward voltage of the LED light source shall be within the defined operating window of the control gear in all operating conditions including dimming if applicable.

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centres and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.

Adatvédelem

This OSRAM driver can be configured using the Tuner4TRONIC software. This requires registering on www.myosram.com and downloading the Tuner4TRONIC software from the Internet. The Tuner4TRONIC software enables users to access and view the operational data of a luminaire or driver via the corresponding programming interfaces. A password key (Config Lock) must be set up in the driver via the Tuner4TRONIC software in order to control which users can access and view operational data. Follow the instructions for password setup. To grant an external person or company rights to access or view operational data, you can assign password keys. In this case, however, you are responsible for ensuring that the third party concerned takes notice of the information described here. However, OSRAM can read out operating data from devices for maintenance and service purposes even when a password key has been assigned. In individual cases, OSRAM will also use its access rights in order to optimize or improve driver hardware and driver functions. In accordance with data privacy principles, any user of operating data (luminaire manufacturers, third parties with access rights) must ensure that personal data (e.g. name, address, location IDs) are only merged with the prior written consent of the person (end user) concerned. The respective user of the operating data is responsible for providing evidence of consent.

Lemondás

Subject to change without notice. Errors and omission excepted. Always make sure to use the most recent release.
